

ExamJet 3.2 - Getting Started

Welcome to ExamJet!

We are very happy you've decided to install ExamJet and think you've made a great choice. You'll soon discover that ExamJet will simplify the way you deliver quizzes and tests.

The Getting Started will give you a possibility to create the first Question Bank, publish it and receive and analyze the results.

So, let's begin

Launch the program Test Manager.

Create a new database

At first you need to create a database, where questions with possible answers, and test results will be written.

While running program for the first time, a pop-up window with database connection form will appear. Check the Radio Button - "Connect to the Local Database" and then "Create a New Database".

Database Setup - Create new database

The screenshot shows a 'Database Setup' dialog box with two tabs: 'Local Database' and 'Remote Database'. The 'Local Database' tab is active. Under the heading 'Connect to the Local Database', there are two radio buttons. The first, 'Create a New Database', is selected. Below it is a text input field with a file icon button. The second radio button, 'Open an Existing Database', is unselected. Below it is another text input field with a folder icon button. At the bottom of the dialog are three buttons: 'Test Connection', 'Create Database', and 'Cancel'.

Save the local database in a desired location.

After successfully creating the database, the Test Manager will run. At the beginning you need to pass the startup wizard, which will help you fill in the minimum information for program to run normally. For quickly ascertaining the functionality of ExamJet, create database with Sample Data. This will allow you to examine program's basic functions on the given example, or you can choose to start with an empty ExamJet database and build up the foundation yourself.

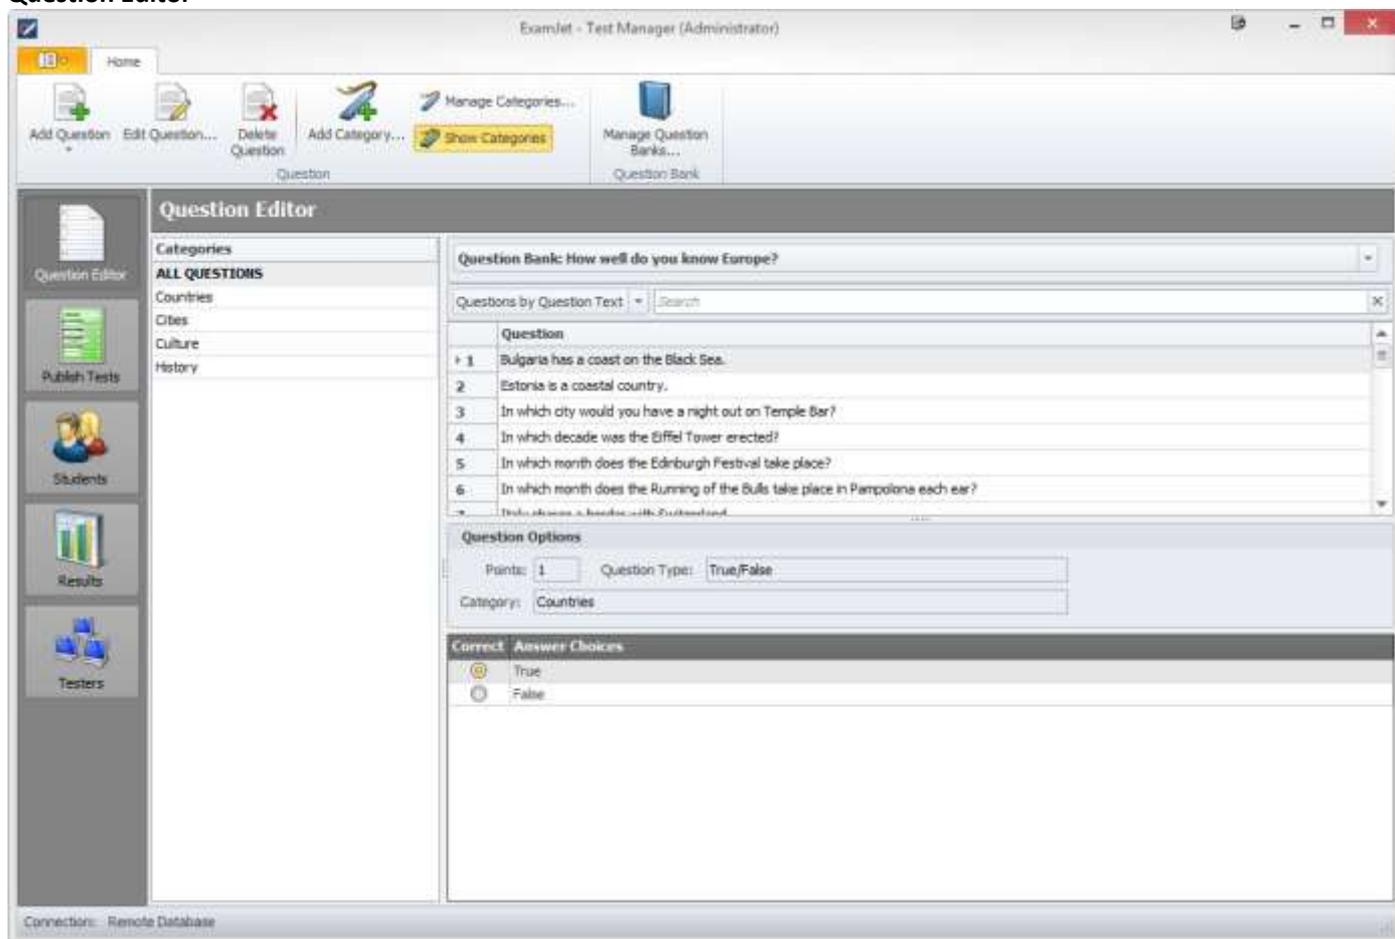

To enter the program, you need to sign in. Default username is "admin" and the password you would have probably entered in startup wizard during creating the database.

Add Question Bank

Question Banks are the ExamJet question collections which are stored as a related questions.

To add the question bank, go to "Question Editor" and click the "Manage Question Banks" button. Question bank managing form will pop up.

Question Editor

In an opened form click the button "Create New" and fill in the desired fields. After closing the question bank managing form, choose the added question bank in the main.

Now you can add questions and possible answers. To add the first question click "Add Question", after clicking, you'll see all the available question types.

Question Types

The screenshot shows the ExamJet Test Manager (Administrator) interface. The top navigation bar includes 'Home', 'Add Question', 'Edit Question...', 'Delete Question', 'Add Category...', 'Show Categories', 'Manage Categories...', 'Manage Question Banks...', and 'Question Bank'. The 'Add Question' dropdown menu is open, showing options: Multiple Choice..., Multiple Answers..., True/False..., Sequence..., Matching..., Fill in the Blank..., and Numeric... The main area displays a 'Question Editor' for a 'Question Bank: How well do you know Europe?'. It features a search bar and a table of questions:

	Question
1	Bulgaria has a coast on the Black Sea.
2	Estonia is a coastal country.
3	In which city would you have a night out on Temple Bar?
4	In which decade was the Eiffel Tower erected?
5	In which month does the Edinburgh Festival take place?
6	In which month does the Running of the Bulls take place in Pamplona each year?
7	Italy shares a border with Switzerland.

Below the table, the 'Question Options' section shows 'Points: 1' and 'Question Type: True/False'.

Publish Test

After adding all the questions, go to "Publish Tests". Take into account, that creating a question bank does not mean it will be available to pass the quiz. You can precisely determine the quiz's parameters by the unique principle of publishing question banks in ExamJet Quiz Maker.

Click the button "Publish New Test". A window will appear where you can define the quiz parameters and choose the question banks you want to be used in published test.

Publish Test – Authorization Type

Publish Test

← Publish Test

Authorization

Authorization Type

Anonymous Testing
Choose and start an Exam. You may enter your name or take the quiz anonymously.

Generate Access Codes
Generate access codes for each student. Only those students can access the test who have the access code.

Set Password
Set one master password for the test.

Next > Cancel

After saving the parameters, the quiz will be available for candidates.

You have three options when choosing the authorization type of your Test:

- **Anonymous Testing.** Choose and start an Exam. You may enter your name or take the quiz anonymously.
- **Generate Access Codes.** Generate access codes for each student. Only those students can access the test who have the access code.
- **Set Password.** Set one master password for the test.

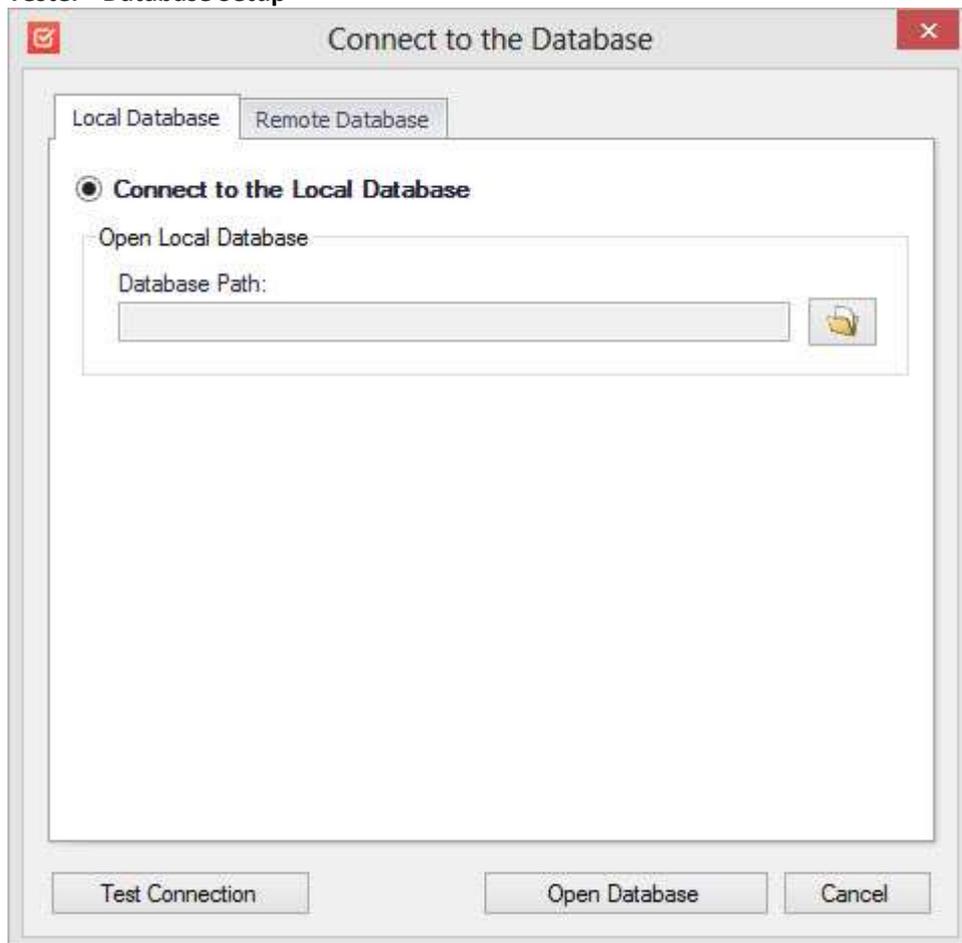

Here ends the quiz preparation part – Now quiz is published!

Tester

Launch the program Tester.

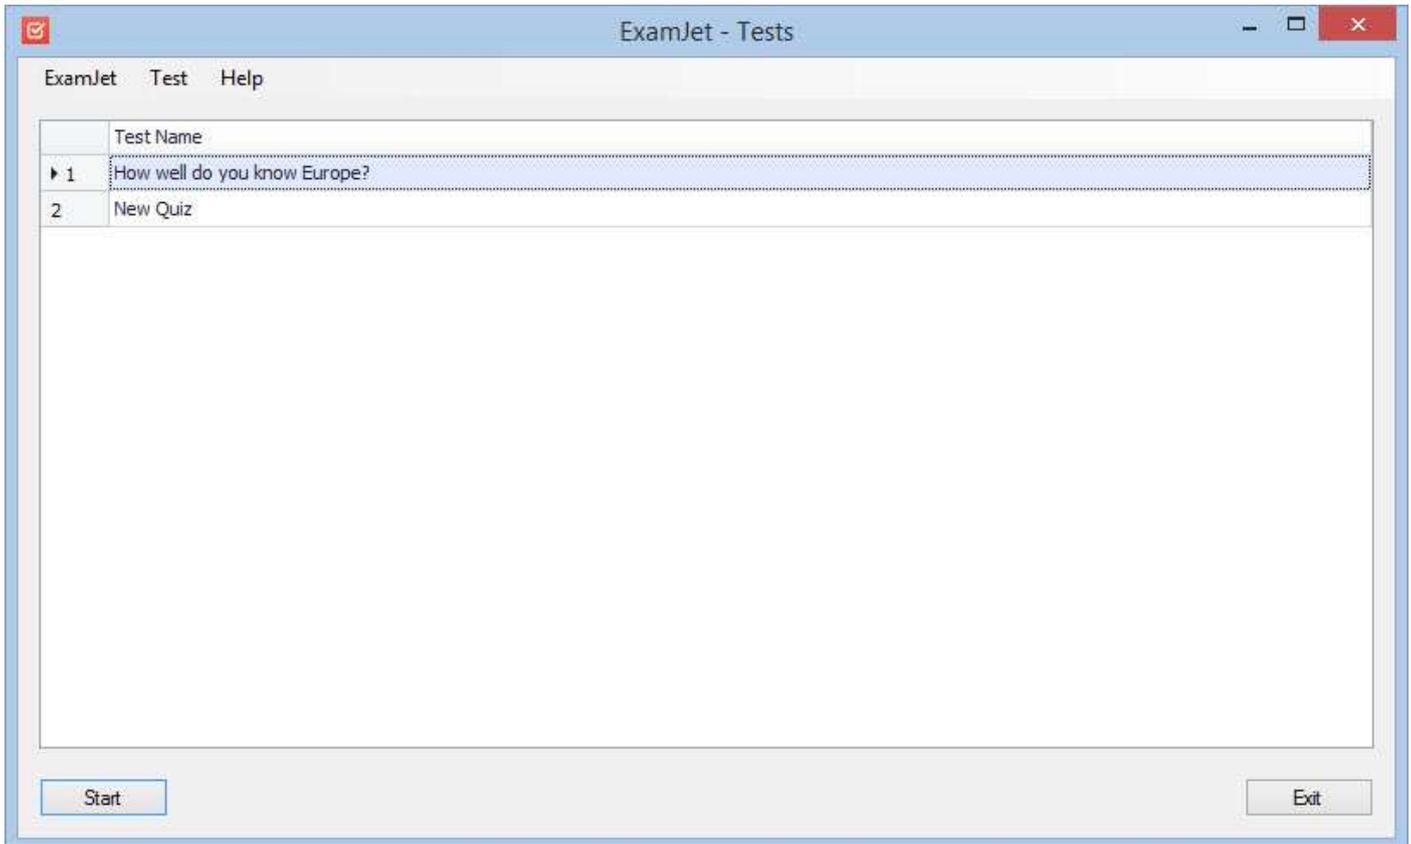

While running Tester for the first time, you'll see the database connection form. Choose the radio button "Connect to the Local Database" and find the local database.

Tester - Database Setup

The Tester will run. You will see all published tests and quizzes. Chose the desired one and press Start.

Tests

Tester - Main Form

The screenshot displays the 'ExamJet - Tester' application window. At the top, it shows 'Question 7 of 34' and 'Time Elapsed: 0:02:00'. The main question is 'How well do you know Europe?' with the specific question: 'What kind of building is the Neuschwanstein in Germany?'. Below the question, there are four answer choices labeled A, B, C, and D, each with a radio button. The choices are: A gallery, A castle, A cathedral, and A mausoleum. To the right of the question area is a list of other questions in the quiz, with 'What kind of building is the ...' highlighted. At the bottom of the window, there is a navigation bar with buttons for 'Answer', 'Back', 'Reset', 'Review Questions', 'Remove Flag', and 'Break (15 min.)'.

Question 7 of 34

How well do you know Europe? Time Elapsed: 0:02:00

What kind of building is the Neuschwanstein in Germany?

Answer Choices:

A	<input type="radio"/>	A gallery
B	<input type="radio"/>	A castle
C	<input type="radio"/>	A cathedral
